Philip,
I just called Chris to follow up. Will send soon. Sorry for the delay.

Thanks

Danny,

See attached abstract from SMW's Wireless Scope. We reviewed with FERC IT today and agreed to discuss in greater detail with SMW before the actual predictive survey is executed.

Thanks

I can send the budget I have but expect update next week

I reviewed the wireless scope today and will forward the extract from SmW's bid response.

The feeling was that it met FERC's expectations but we should review with SMW before implementing

Yes
I can send what should be the current budget for IT but suggest we finalize after updated info comes from SMW on the 24th. I will send current furniture budget but as you saw today, still a bit fluid until final decisions.

Also, will send out the scope that SMW which indicates their scope for wireless design. We should review with FERC but appears we have some coverage on this

Thanks
